Kosta, UR5FFC, moving these evening to KN55 for QRL and try activate EM65F. Kosta, UR5FFC, have an agreement with his friend Alex, UR7FV, to use his country position for MS activity. He has there FT-897 and 9EL F9FT vertical polarized and manualy rotate. Kosta will try to be QRV tomorrow fm early morning till 04:00z fm KN55dx, QTH - Prymorske. At 04z have qrl and leave for the job. He dont know wether internet will work there, if not Kosta will use random 1-st split 370/358. He have not permission to use his own call and so he be qrv under special callsign EM65F. Than will come back home after finishing his work at the evening tomorrow. Depending on the work result it might be repeated for a more long time after weekend... CU! 73!

The next DL1YMK EME Event will take place from Thursday, 13.05.10 until Sunday, 23.05.2010 - LATEST NEWS from the M&M Team, dated 2010-05-01: Hello lunatics, today we got a final Roger for the customs procedure for importing our equipment (with the helping hand of the German embassy), so we hope to be able to pass all border controls with the car and the equipment. As we announced

earlier, we hope to get qrv under XX/DL1YMK from Thursday, 13.05
for 10 days on 70, 23 and 13 cm. It is a pity, but we didnï¿½t obtain
an allowance for 9 cm. As with our trip to OH0, the Aland isles, we
will not disclose the destination in order to give all interested
hams the challenge to decode the special call for themselves on a
truely random basis again. However, we made a timetable for the
bands showing the times of our moonwindows to give all the
possibility to check their mutual windows. Now make an educated
guess, hiï¿½.. The time table is available via the homepage of OK1DFC
who kindly set up a site for our oncoming DXpedition:
http://www.ok1dfc.com/Peditions/ymk10/ymk10.htm
The first day on each band will be in truly random, without
arranging skeds, however later skeds are possible. Please mail to
DL1YMK"at"aol.com for any sked requests, even in JT mode for smaller
stations, which missed us during the random activity. Please note:
during the DUBUS 23cm contest we will have only very short windows
to the US! Preferred frequencies: 432.045 - 1296.045 - 2301.975 (RX)
2304.100 (RX) / 2320.100 (RX/TX). We will start our trip on Monday,
10th of May as we need 2 days to our destination.

** HK0 / EK92 **

San Andres Island, HK0, back on Air - 5J0BV will give it another go approximately June 10-21. I believe I have the KW amp issue resolved. 6M8GJ for antenna. Expect to have the "good" QTH I discovered last year - the one surrounded by concertina wire topped wall to keep the neighbors away :) As they say, "Three times is a charm" so lets hope the Es gods and ghouls will blow the band open to EU. ** KH5 **

Founded by Eric Scace (K3NA) and Carsten Esch (DL6LAU) in 2007, Radio Expeditions, Inc is a permanent, non-profit organization of volunteers whose first project was the 2008 VP6DX record breaker expedition to Ducie Island. The second project is a DXpedition to Jarvis Island, which is planned to take place between 17 November and 1 December (depending on weather and sea conditions). The dates were chosen to maximize propagation openings on both low and high bands to Europe. A large group of operators will staff 12 stations on CW, SSB and RTTY on 160-6 metres. Applications for the required government permits have been submitted to the US Fish & Wildlife Service. No individual contributions are being solicited until the permits have been received.
